Press Release

Formtek Cleveland showcases new Supermill at Fabtech

Formtek Cleveland, a member of the Formtek Group of companies (which includes Cooper Weymouth-Peterson (CWP), B&K, Dahlstrom Industries, Hill Engineering, Iowa Precision Industries, Lockformer, Rowe, and Yoder) will showcase the 2DWR, a high speed drywall stud machine at the Fabtech 2003 show in Chicago.

The B&K 2DWR Supermill features:

- A standard production speed of 500 FPM with the capability of 800 FPM with minor modifications
- Material thickness range from .015” to .048”
- Web adjustment range from 1.625” to 8”
- Patented rotary punch and shear technology
- No tooling changeovers
- Width and gauge changeover in less than five minutes

For more information contact Formtek Cleveland at 216-292-6300.
